1. After 10 May 1953, the Soviet troops vacated some sections of the barracks installation in Spremberg. Starting at the same date, KVP trains arrived at the post. An informant determined that, on 10 May 1953, seven tanks and an unidentified number of AT guns and trucks were unloaded from a train which had come from the direction of Goerlitz. On 12 May 1953 about ten tanks and an unidentified number of trucks and motorcycles were unloaded from a train which had come from the direction of Cottbus.

Comment. It is believed that most of the KVP units which moved to Spremberg came from Saxony. The tanks and the blue service color source observed indicate that a tank unit is presumably activated in Spremberg from personnel of various cadre units. This unit probably is subordinate to TV 3000 (Armeegruppe Sued).
